### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance. The prior art made of record in the attached form PTO-892 considered to be pertinent to the submitted application.

Yoneda US # 7,019,482 discloses a sliding mode controller system on a switching hyperlane regardless of the magnitude of disturbance. The motion controller includes a target position generator, a sliding mode controller, and disturbance observer and a state observer. The target observer generates a target position to the sliding mode controller based on position and velocity data. The state observer estimates the state of the controlled system and provides the state to the sliding mode controller. The disturbance observer provides an estimated disturbance to the sliding mode control. The sliding mode controller generates a control input to the controlled system with nonlinear component set to equal the negative estimated disturbance and the linear component based on the estimated state and target position.

However, none of the prior art teaches or suggests claimed limitations in combination with state variable that is expressed by claimed equation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
